- BPMN Diagram
- BPEL Exports\*
- Cause & Effect Diagrams
- Flowcharts
- IDEF0 Diagrams\*
- Network Diagrams
- Organization Charts
- Pick Charts
- Process Maps
- SIPOC Diagrams
- SPC Charts
- Swimlane Diagrams
- UML Diagrams
- Value Stream Maps

\* Requires additional product

## A Solid Foundation for Process Improvement

*iGrafx® FlowCharter™ 2005 is a leading process visualization and modeling tool to help organizations achieve business process excellence. With unique features and powerful capabilities for initiatives such as Six Sigma, Lean, ISO, Sarbanes-Oxley and Business Process Management, you gain significant advantage by deploying an integrated solution to meet the needs of the entire organization. iGrafx FlowCharter 2005 is fully compatible with the family of process excellence solutions from iGrafx.*

Key Feature	Benefit
Intelligent Swimlane® Diagrams	Experience an ROI by minimizing time to create and edit process maps
Hierarchical Process Maps	Improve readability and comprehension through logical design
Lean Tools	Improve manufacturing and transactional processes using state-of-the-art techniques
BPM Tools	Bridge gaps from business to IT through standards and 'execution ready' diagrams
In-line Analysis	Instantly understand process capability and the impact of changes
XML Import/Export	Readily share data with other enterprise systems
Customizable Data Fields	Improve model comprehension and ownership by linking closely to organizational data standards
Dynamic Page Size	Lack of barriers enables greater focus on capturing process knowledge
Visio® Import	Reduce development time by leveraging legacy content
Instant Web and Microsoft® Office® Publishing	Improve visibility and compliance through easy knowledge sharing
Seamless Integration with the iGrafx Family	Leverage and share organization-wide efforts and maintain central data management

## When You Need to Stay Ahead

Business is increasingly complex. Customer demands, regulatory requirements, and competitive and economic pressures have all contributed to an increase in the creation and adoption of quality improvement initiatives, international standards and regulatory requirements. In today's world it is common for organizations to be involved in a number of process-based initiatives such as Six Sigma, Lean, ISO and Sarbanes-Oxley. The goal is to leverage best practices, tools and corporate knowledge throughout the organization and avoid process knowledge islands.

iGrafx FlowCharter 2005 is a powerful, easy-to-use process mapping tool that provides a foundation for organization-wide process excellence. iGrafx FlowCharter 2005 reduces the time it takes to document processes and business systems, and helps you communicate and achieve a clearer understanding of how tasks, activities and processes must be carried out. It not only promotes compliance and best practice, but also provides a foundation for better management.

With numerous diagram types, context-sensitive interface and a wide range of output options, iGrafx FlowCharter 2005 is the most productive process mapping and diagramming software available today. And unlike flowcharts created with general drawing tools, iGrafx diagrams are information-rich, easily updated and a perfect solution whether conducting home-grown process improvement or when legislation or standards demand rigorous compliance.

## A Pillar of Process Excellence

iGrafx FlowCharter 2005 is uniquely designed to meet the specific needs of individual process initiatives while seamlessly integrating with other iGrafx components for a unified approach to process excellence. With a ready interface to the central process repository of iGrafx® Process Central® 2005, iGrafx FlowCharter 2005 serves as the foundation for any organization's process improvement initiatives. iGrafx will help you bridge the gap between the major organization constituencies - IT, process initiatives and business analysts - to ensure a level of process consistency, management, history and control across the enterprise, enabling process excellence.

## Leverage Expertise for a Higher ROI

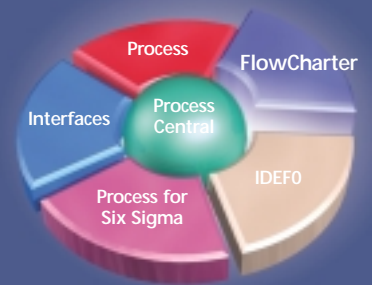

iGrafx tools are used by leading consultants throughout the world. These organizations use iGrafx to help companies realize the benefits of process excellence. For more information on our extensive list of partners, please visit [www.igrafx.com/affiliates](http://www.igrafx.com/affiliates).
